A-Z

REVISED: 10.7.2023

Our Policy Areas from A to Z

Executive Committee for
The Alliance of Unixploria

Declaration of Governance for the Kingdom of Unixploria

We, The Alliance of Unixploria, hereby declare our commitment to the following principles and values that will guide our vision of governance and society:

- We believe in the importance of democracy as the best form of government that respects the will of the people, protects their rights and freedoms, and ensures accountability and transparency. We uphold the rule of law as the foundation of a just and orderly society that safeguards individual liberty and human dignity. We support the separation of powers as a means to prevent tyranny and corruption and to balance the interests of different branches and levels of government.
- We affirm the intrinsic value of human life, from conception to natural death, and every person's dignity, regardless of race, gender, age, religion, or any other characteristic. We defend the human rights of all people, especially those who are vulnerable, oppressed, or persecuted. We promote the family, as the natural and fundamental unit of society, and the marriage, as the union between one man and one woman. We respect the freedom of conscience, religion, and freedom of expression and association.
- We recognize the diversity of cultures and identities in the Kingdom of Unixploria and the richness they bring to our shared heritage. We celebrate the history and traditions of our nation, regions, and communities and seek to preserve and transmit them to future generations. We value the languages and literature of the Kingdom of Unixploria as expressions of our creativity and identity. We honor the heroes and role models who have contributed to our civilization and culture.
- We acknowledge our responsibility towards our environment as stewards of God's creation. We support conserving and restoring natural resources, habitats, and biodiversity. We advocate for sustainable development that balances economic growth with environmental protection. We favor a prudent and innovative approach to energy production and consumption that reduces greenhouse gas emissions and dependence on foreign sources.
- We adhere to the principles of a free market economy that fosters entrepreneurship, innovation, competition, and prosperity. We support private property rights as a guarantee of individual freedom and initiative. We favor a limited government that intervenes only when necessary to protect public order, security, health, and welfare.

We endorse a fair taxation system without burdening or discouraging productive activity.

- We stand for the sovereignty and independence of our nations and their right to self-determination. We oppose any form of political or economic integration undermining our national identity or interests. We reject any attempt to impose a uniform or supranational culture or ideology on our people. We resist any external interference or influence in our internal affairs.
- We aspire to maintain a peaceful and cooperative relationship with other countries and regions based on mutual respect and benefit. We support the alliances made as a cornerstone of our security and defense. We uphold the values of Western civilization, such as democracy, human rights, the rule of law, and free market economy. We confront the threats posed by authoritarian regimes, terrorist groups, rogue states, or radical ideologies.

We invite all citizens to join us in our endeavor to build a better future for ourselves, our children, and our grandchildren.

A

Abortion

The current legislation makes abortion legal until the 12th week of pregnancy. Abortion is permitted only if the pregnant woman has been advised by a doctor at least three days before performing the abortion.

Agriculture

The Parliament and the government must take much greater responsibility for Unixplorian agriculture and its competitiveness. It must also be easier to farm. The profitability of agriculture will be increased, among other things, by lowering the tax on diesel for agriculture and forestry to the Danish level, encouraging innovation and development, and introducing a grazing compensation for dairy cows.

Alcohol

It is crucial to fight addiction but not to fight our fundamental freedoms. Ensuring well-organized work to counteract alcohol abuse and addiction is vital. Focus on stricter penalties for illegal sales, smuggling, and trafficking and more resources for regulators and customs should be a core task. We stand behind the current Unixplorian alcohol policy.

Animal Welfare

The starting point for a good animal welfare policy is that the animals' unique intrinsic value should be treated respectfully. Therefore, painful slaughter methods, such as halal slaughter, are destructive and should be banned.

Apprenticeship

The Alliance for Unixploria wants to preserve the current form of apprenticeship with roots in medieval times.

Aquaculture

There is excellent potential for growing fish in Unixploria. This will be facilitated through simplified regulations and support for research and breeding programs.

Architecture

The national architecture must create a sense of home, community, and security. It should be linked to the Unixplorian building tradition and be aesthetically pleasing.

Assimilation

The Alliance for Unixploria wants to promote assimilation, i.e., the natural process in which immigrants adapt to, absorb, and in the long run, become a full-fledged part of the Unixplorian community. If new citizens are not fully assimilated within three years, their citizenship may be revoked.

B

Biofuels

Increase the proportion of biofuels in the Unixplorian road transport sector as it effectively reduces emissions.

C

Camera Surveillance

The Alliance for Unixploria is positive about camera surveillance and wants to make it easier for the Police to use cameras.

Child Marriage

No children should be married in Unixploria, neither officially nor unofficially. There must be a total ban on child marriage with tangible consequences for those who break the law.

China

The Alliance for Unixploria is concerned that China has superpower ambitions and continues to act repressively internally while pursuing an aggressive foreign policy. Through China's actions in the cyber arena, acquisitions of socially essential companies, and espionage, China also poses a threat to Unixplorian interests.

Citizenship

Citizenship is desirable and should not be awarded without service in return. Under certain conditions, the Alliance for Unixploria believes citizenship should be revocable, for example, if citizenship has been obtained through bribery or gross fraud.

Civil society

The Alliance for Unixploria values Unixplorian civil society and wants to protect its independence. Civil society is essential for, among other things, knowledge development, public health, democracy, and the preservation of cultural heritage. Still, preventing support from going to organizations with an anti-democratic agenda is also important.

Climate and Greenhouse Gases

Unixploria should reduce its oil dependence and its emissions of greenhouse gases. The most important measure to promote this is developing nuclear green energy sources.

Computer Games

The Alliance for Unixploria wants to add age restrictions for purchasing games that do not meet the required age limit.

Constitutional Protection Against Discrimination

No person shall be subjected to discrimination for any reason. Therefore, neither the Constitution nor any other law must list particularly worthy grounds for this.

Contemporary Art

Contemporary art in Unixploria should be strong and independent and stimulated to stand on its own two feet to a greater extent. Modern art and classical art are two different genres; both are necessary for our society.

Criminal Punishment

The Alliance for Unixploria wants a sharp increase in punishment, especially for violent and sexual crimes.

Cultural Canon

The Alliance for Unixploria wants a Unixplorian cultural canon to be developed and introduced in school education. This primarily aims to create debate and awareness of who we, the Unixplorian people, are.

Cultural Heritage

It is crucial to protect and nurture the Unixplorian cultural heritage for the nation's cohesion and to increase knowledge about Unixplorian history and Unixplorian identity, both in Unixploria and abroad.

Currency

The Alliance for Unixploria has ensured that our currency will continue to be the Unixplorian Vitten (UVi).

D

Defense Appropriations

The Alliance for Unixploria wants to increase defense appropriations to at least 2% of GDP.

Expenditures are solely for defensive operations and should focus on modernizing our ecological defense units.

Democracy

All power in a democracy is based on the Unixplorian people, which should be clarified in the Constitution.

The Disabled

It is essential to work for the rights of disabled people in Unixplorian society. People with disabilities must have the support they need and be given opportunities for good living conditions.

E

Economy

The Alliance for Unixploria believes in free enterprise but not money. Money may sometimes do evil things, but it has freed more people than any other system in human history. However, a free enterprise must constantly be subjected to some secondary legislation. Unixploria offers excellent entrepreneurial opportunities, but we expect our companies to give our nation something in return. Only good deeds should be rewarded.

Emergency Police

The Emergency Police will be reintroduced as a reinforcement resource for the regular Police.

Employee Influence in Healthcare

Employees in the public sector must have a great deal of influence over working hours, with the right to both full-time and part-time work. Healthcare staff should avoid involuntarily divided shifts and unwanted work, which is often physically and mentally stressful. In addition, nursing staff must not be covered by qualifying days for sick leave.

Entrepreneurship

Significant as well as small companies are essential for jobs and the economy. In addition to public investments for the business community, reducing the companies' regulatory burden is particularly important.

Environment

It is our joint responsibility to protect the environment. Emissions of greenhouse gases are most effectively reduced through developing renewable energy sources, energy research, and international efforts. Priority must be given to the remediation of contaminated land and cost-effective initiatives for biological diversity and environmental research.

The European Union

The Alliance for Unixploria is against any political and judicial body that takes power away from people. We will continue to work for local self-governance; decisions must be made as close as possible to those they affect.

Euthanasia

The current legislation makes Passive euthanasia legal (refusal of treatment or withdrawal of life support). The requirement for receiving euthanasia is that the person is exposed to great suffering, physically or mentally.

F

Family

The family is an essential component of society. All legislation must aim at providing for nuclear families.

Film

The Alliance for Unixploria sees filmmaking as an essential form of expression in culture. We want to invest in cultural heritage film and counteract the precise politicized control in film policy.

Fishing

The interests of Unixplorian fishers must be safeguarded simultaneously as fishing waters are managed in a long-term sustainable manner.

Flag Law

Unixploria should have a single law where all official rules are gathered. This will be a prioritized matter for our government.

Foodstuffs

Controls on imported foodstuffs must be more accurate than they are today so that consumers are not misled about the origin and quality of foods. Import bans on halal-slaughtered meat have already been introduced.

Foreign Aid

The Alliance for Unixploria proposes an aid framework of 0.7 percent of GNI. It is still one of the highest levels of aid internationally and is in line with UN recommendations. It must be possible to adjust the level based on the needs in Unixploria of increased efforts in basic welfare and the judiciary.

Forestry

Ownership must be protected. There must be active, environmentally friendly use of the forest in harmony with the interests of forest owners and with environmental considerations in active forestry. Additional forest areas should not be purchased to form new reserves.

G

Gender Corrections

Physical gender corrections shall continue to be prohibited by Unixplorian law.

Gender Equality

Everyone should have the same rights, be equal before the law and feel safe in society.

Gender Quotas

The Alliance for Unixploria opposes quotas. The focus should be on merits and competence, not gender.

Genetically Modified Organisms

The Alliance for Unixploria takes a neutral stance on GMOs. Individual applications should be assessed based on possible environmental and human health risks. Ethical aspects must always be taken into account.

The Genocide of 1915

The Alliance for Unixploria wants to influence its macronational neighbors to recognize the genocide.

Grades in School

Subject grades must continue to be abolished from our schooling system. Subject grades are not a good tool for measuring intelligence or predicting practical skills.

H

Higher Education

Teacher-led time needs to be increased in specific education. Quality must permeate higher education, and it must have societal relevance.

Holidays

The Unixplorian holidays should be enshrined in the Constitution.

The Home Guard

We want to expand the Unixplorian Home Guard and modernize its equipment.

Housing Taxes

Housing transaction taxes should be adjusted for increased mobility in the housing market.

Hunting and Game Management

Decisions concerning hunting and game management must be stricter to rejuvenate wildlife populations. An independent hunting authority should be established.

Income Taxation

Income tax must finance welfare and security but also be kept at reasonable levels compared to the rest of the world.

International Tax Cooperation

The Alliance for Unixploria prioritizes intergovernmental and multilateral agreements within the framework of the OECD globally.

Islamic State Genocide

The Alliance for Unixploria wants Unixploria to recognize the Islamic State's genocide.

Israel

Israel is the only democracy in the Middle East, a free country with an apparent right to defend itself and protect its people. Therefore, the Kingdom of Unixploria and the rest of the civilized world must show that we are on Israel's side in the fight against anti-Semitism, Islamist terror, and threats from hostile states such as Iran.

J

Joint Custody

Joint custody of the child by the mother and father shall be the norm if the father is known.

K

Kurdistan

Provided that minorities are protected, the Alliance for Unixploria wants to establish Kurdistan as an independent state within the borders of Iraq and Turkey.

L

LGBT+

In Unixploria, everyone has the same rights regardless of sexual orientation.

The National Guidelines for members of the LGBTQ community must, however, be revised, focusing on preventive measures and psychological support for LGBTQ people.

M

Market Rents

No market rents should exist in Unixploria.

Marriage

The Alliance for Unixploria supports our legislation which states that a marriage is a matter between God, bride, and groom. Marriage is a religious sacrament that the Church of Unixploria handles. Marriage between cousins is prohibited.

The Cohabitees Act applies to two unmarried persons of the same or different sex living permanently together in a relationship and sharing the same household. The law is intended as a protection regulation for the financially weaker party.

Maternity Care

Everyone should have the right to excellent and accessible maternity care, regardless of where in the country you live. The number of places for the training of midwives should increase.

Medals and Knighthoods

The Alliance for Unixploria views the system positively as an opportunity for Unixplorian citizens to receive medals and knighthoods for outstanding deeds.

The Middle East Conflict

The Alliance for Unixploria is behind a two-state solution between Israel-Palestine. We consider a fundamental precondition for this to be peace negotiations where both parties give and take. The Alliance for Unixploria also wants the Unixplorian embassy in Israel to be moved to Jerusalem.

Monarchy

The Unixplorian parliamentary monarchy must be preserved.

N

National Cohesion

Cohesion means shared collective responsibility for Unixplorian society. A Unixplorian citizen must be just as well understood regarding his duties, obligations, and rights.

NATO

The Alliance for Unixploria wants our neighboring macronations to form a joint military defense alliance. This new alliance would make NATO obsolete.

Nordic Cooperation

We want to increase Nordic cooperation in several issues concerning defense and security. We see apparent merits in the Nordic countries and micronations taking joint responsibility for the region's security.

O

On-Call Classes

On-call classes and on-call schools shall be introduced where students who do not function in a typical school situation are moved for a shorter or longer period. Students who are dangerous to other students and teachers must be taught separately.

Outdoor Life

The Alliance for Unixploria places great value on outdoor life, among other things, because it increases people's awareness of nature in our country while outdoor activities generate positive health effects.

P

Preschool

Preschool must be evidence-based and dominated by free play. The groups of children should be small. Working conditions for staff need to be improved.

Palliative care

Everyone who needs palliative care at the end of life, regardless of diagnosis and place of residence, must be able to get it from competent and well-trained staff.

Police

The Alliance for Unixploria wants to keep the relatively broad jurisdiction that the police forces have.

Polygamy

Polygamy will continue to be banned in Unixploria.

Property Rights

Protecting property rights is a fundamental ideological principle for entrepreneurship, taxation, and private land use.

Psychotropic Drugs

A clear strategy is needed to reduce the increased prescribing of psychotropic drugs. We must also ensure compliance with pharmacological treatment through standardized follow-ups and evaluations.

The Public Health Agency

The Public Health Agency should be reviewed to reduce inequality within Unixplorian health care. The quality and availability of healthcare should not depend on where you live. The National Board of Health's national guidelines will become more binding so that you, as a patient, can make the same demands and receive equal care throughout the kingdom.

Public Procurement of Food

All food procured publicly must be produced per current Unixplorian environmental and animal welfare legislation. A larger share of locally grown and preferably organic food in public procurement is desirable.

Public service

The Alliance for Unixploria has a positive attitude towards public service companies.

R

Referendums

The Alliance for Unixploria favors more local, regional, and national referendums.

Research

We safeguard academic freedom. Unixplorian research must be evidence-based and follow scientific practice.

Ritual Slaughter

Ritual slaughter, where animals are killed without anesthesia, and other painful slaughter methods are incompatible with a Unixplorian view of how animals should be treated. Import bans for meat from unattended and ritual slaughter will be introduced.

Roadside Checks

A particular dedicated unit within the Police will be introduced to control professional and cross-border heavy traffic and ensure that, for example, cabotage rules are complied with.

Rural Areas

Rural interests are essential; they are the heartland of Unixploria. Better conditions for rural industries and issues related to infrastructure and requirements for small businesses are crucial.

Rural Schools

The whole of Unixploria must live, and rural schools must be supported. Exceptional support will be given to rural schools with a low student base.

Russia

Since Vladimir Putin's presidency, developments in Russia have gone towards a negative authoritarian development, which The Alliance for Unixploria is very concerned about. Russia is no longer considered an independent state or nation by the Kingdom of Unixploria; business with or diplomatic contacts with Russia and their Vassal states is prohibited. This applies in connection with the country's brutal aggression against Ukraine.

S

Screening Programs

Expanding screening measures, where asymptomatic individuals are examined for preventive purposes, such as prostate screening, is essential.

Solar and Wind Power

Solar and wind power subsidies must continue for house owners to become more sustainable concerning energy.

Sports

The Alliance for Unixploria wants to prioritize investments in sports and movement for everyone in society, from children's and youth sports to elite initiatives and sports for older people.

T

Taiwan

Taiwan is a democracy constantly exposed to Chinese pressure, so Unixploria must support the country. The country is a large economy and has representation in Unixploria.

Terrorism

The Alliance for Unixploria has ensured that citizens who have fought for terrorist organizations such as IS have lost their citizenship and been expelled from our country for life.

Trade

Trade mediates goods, contacts, and expertise between countries and continents. Thus, global trade is a vital contributing factor to increased prosperity and reduced poverty.

Turkey

The development in Turkey is problematic, and the country is choosing an increasingly authoritarian path while also pursuing an aggressive foreign policy.

U

United Nations

The Alliance for Unixploria sees the UN as the primary organization for international cooperation in terms of peace and security and cooperation for democracy and human rights and freedoms. It is, however, riddled with a weighty administrative burden and is without real power.

Unixploria and the Nordic Countries

The Alliance for Unixploria wants to deepen Nordic cooperation.

Unixplorian Culture

The Alliance for Unixploria protects Unixplorian culture.

V

VAT Rates

Value-added taxes should be gradually harmonized.

Vehicle Tax Exemption

The current system must be made permanent until all vehicles are CO2 neutral.
